Material Safety Data Sheet

RC

Identification

Product Name: RC
Trade Name: RC
Use: Homeopathic biodynamic Fertiliser
UN Number: None Allocated
Dangerous Goods Class: None Allocated
Hazchem Code: None Allocated
Poisons Schedule: None Allocated

Physical Description/Properties

Appearance & Odour: Clear liquid with faint herb odour
Boiling Point (C) : No Data **Specific Gravity:** 1.06
Vapour pressure mm/Hg: No Data **Melting Point:** Liquid
Vapour Density: No Data **Evaporation Rate:** Low
Solubility in water: completely soluble **Percent Volatile:** Nil

Flammability Limits Non-Flammable

Ingredients

Homeopathic dilutions greater than 6 X of Nettle and Yarrow mixed using a 12% alcohol and distilled water base

Health Hazards

Short-term exposure by all routes is considered to be practically non-harmful.

RC is an approved natural product for use in biodynamic and organic systems. The approval is issued by BDAA (Biodynamic Agricultural Association) registration number 470.

Swallowed: up to 250mls has no effect when swallowed by men.
Skin: Contact with the skin gives rise to no irritation.
Eyes: Unlikely to cause irritation. However there is no data available.
If irritation is caused flush the eyes with running water
Inhalation: Once again there is a shortage of data on this subject. There have been no reports of breathing difficulties from operators in the field even in windy conditions.

As with any product, ingestion, inhalation and prolonged or repeated skin contact should be avoided by good occupational work practices.

Storage & Transport: Not defined as a Dangerous Good by the HSE (Health and Safety Executive) for the transport of Dangerous Goods by Road and Rail.

Spills: The product is not flammable.
The product is quite soluble in water and can be flushed away with quantities of water.
The material is neither slippery nor corrosive and can be simply washed into the soil with water.

Disposal: Should not be disposed of directly into watercourses.

Fire/Explosion Hazards: This material will not burn even if surrounded by fire due to the high concentration of water in the formulation. It is more likely to dampen a fire or present a barrier depending on how it is stacked.
