

**Effluent Treatment  
Nitrate Digestion  
Drought Resistance**

bdmax@xtra.co.nz

**Etherics 7 (E7) is made from a selection of biodynamic preparations and homeopathically diluted.**

**It is designed to help the plant make maximum use of the water and nutrients available to it from the soil and from the atmosphere.**

**Etherics 7 also helps in the stabilisation of nitrates within effluent treatment processes.**

In both these trials one application of Etherics 7 (E7) was used.

Field application is 250mls per hectare  
Garden application is 1ml per litre of water.

Field application costs are between \$15-\$17 per ha.

**Effluent Treatment**

Cost \$70 per 150,000 gallons

Benefits: reduced smell, minimal crusting,  
Better palatability and even grazing
